1) Create a keypace by name Student

sql> create keypace student with replication:
{ 'class': 'SimpleStrategy', 'replication-factor': 1 };

2) Create a column family by name Student-Info

sql> student> create columnfamily Student-Info
(s-id int primary key, s-name text, Date-of-joining
text, sem int, Dep-name text);

3) Insert values

sql> student> BEGIN BATCH

Insert into student-info values (101, 'Bharath', '08-08-
2017', 7, 'ISE') ;
Insert into student-info values (102, 'Nikhil', '09-08-
2020', 5, 'ISE') ;

A) Update student name of student id 103

sql> student> update student-info set s-name =
"Nikhil" where s-id = 103 ;
